DURNAL OF BEHAVIORAL MEDICINE - Volume 5, 1982

Journal of Behavioral Medicine is a broadly conceived interdisciplinary publication devoted to furthering our understanding of sical health and illness through the knowledge and techniques of behavioral science. Application of this knowledge to prevention, ment, and rehabilitation is also a major function of the journal, which will include papers from all disciplines engaged in behavioral icine research: psychology, psychiatry, sociology, epidemiology, anthropology, health economics, and biostatistics. Examples of cal research areas of interest include: the study of appetitive disorders (alcoholism, smoking, obesity) that serve as physical risk ors; adherence to medical regimen and health maintenance behavior; pain; self-regulation therapies and biofeedback for somatic rders; sociocultural influences on health and illness; and brain-behavioral relationships that influence physiological function. Articles idered for publication include: theoretical and review articles, experimental studies, technical and methodological articles, and studies
